

ENVIRONMENTAL POLICY

E-Waste Recycling Australia is committed to achieving the highest performance in Environmental Management minimising the environmental impact of our activities. Further, we will endeavour to increase our use of renewable resources over time where possible.

We are committed to:

- Meet or exceed the requirements of current and future environmental legislation and other requirements to which E-Waste Recycling Australia subscribes.
- Establishing and reviewing environmental objectives compatible with our strategic direction.
- Provide appropriate resources to meet and maintain best practice waste management processes in all our activities.
- In all purchasing decisions we will explore and consider renewable materials or products in our maintenance activities.
- Strive to reduce our energy consumption wherever possible.
- Recognise the need to reduce carbon emissions.
- Meet our commitment to continual improvement and the prevention of pollution.

We expect all our employees and contractors to:

- Comply with all Environmental Legislation and our Environmental Policies and Plans.
- Support our objective of conducting sound environmental practices.
- Help identify practices, attitudes, and traditions that are likely to harm the environment.
